LOCHHEAD POWER STATION

Celtic Bio energy are a supplier of proven cutting edge technology in the field of renewable biogas production.

They were commissioned by Fife Council to orchestrate the building of a new renewable power plant in Lochhead Land Fill Site, Scotland.

As part of this new power station, J & J Carter were commissioned to manufacture a PVC roof to store the Bio Gas whilst organic material was broken down.

KEY FACTS

LOCATION: United Kingdom

STRUCTURES: Air Supported

INDUSTRY: Environmental Solution
