

# VICTORIA PARK HEALTH CENTRE

The Manchester Mental Health and Social Care Trust wanted to refurbish the gardens of the Victoria Park Health Centre to create an outside area for patients to use.

J & J Carter installed a PVC tensile membrane fabric canopy. The supporting steel frame is hot dip galvanised prior to painting, with integrated drainage. The canopy covers 30 sq.m and is an engineered modular design. This design creates a cost effective and easy to manage solution.

Work was completed on the live site in 3 days with no disruption to patients and staff.

## KEY FACTS

**LOCATION:** United Kingdom

**INDUSTRY:** Healthcare

**MATERIALS:** PVC/PES

**STRUCTURES:** Frame Supported

**ROOF FORMS:** Barrel Vault
