ELLINGTON SCHOOL FOR GIRLS

PLAYGROUND SHELTERS FOR SCHOOLS

J & J Carter were responsible for the design and build of a tensile fabric canopy covering the outdoor playground, dining area and walkway at Ellington School in Ramsgate, Kent. Overcoming the design challenge, we provided a canopy to a frame that was already designed and manufactured to create an attractive, three dimensional shape by using vertical arches.

KEY FACTS

LOCATION: United Kingdom

INDUSTRY: Education

STRUCTURES: Tension Structure

ROOF FORMS: Barrel Vault
