

PENRUDDOCK PRIMARY SCHOOL

PLAYGROUND SHELTERS FOR SCHOOLS

Penruddock Primary School needed a tensile structure to provide shade and shelter for students when they were outside. J & J Carter installed their Membrane-Lite Modular Barrel Vault Canopy. The shade canopy is made from a PVC Polyester tensile fabric which has a typical life expectancy of 20 years. The framework is made from tubular hollow section steel, which is treated with a paint system to provide 15 years to first maintenance.

LOOKING FOR A TENSILE STRUCTURE? GET IN TOUCH!

If you are in need of a playground shelter for your school, look no further than J & J Carter. We have decades' worth of experience in tensile structure design, manufacture and installation, and are committed to providing you a stand-out product and service.
