THE CITY ACADEMY, HACKNEY

J & J Carter is thrilled to have played a pivotal role in the development of this cutting-edge academy.

Situated in the Homerton district of the London Borough of Hackney, The City Academy is a prestigious coeducational secondary school and sixth-form institution with academy status. It stands as one of the nation's leading academies, specialising in business and financial services while offering a comprehensive curriculum to any state school.

This remarkable institution was meticulously designed and constructed through the collaborative efforts of the City of London's City Surveyor's Department, Studio E Architects, and the renowned contractor, Willmott Dixon. Notably, Willmott Dixon, recipient of the esteemed "School Contractor of the Year" award at the time, entrusted J & J Carter with the task of conceptualising, fabricating, and installing an exceptional cycle parking shelter.

Our team engineered a remarkable cantilever structure boasting an impressive 2.5-meter span and a sprawling 25-meter length. To ensure both durability and aesthetics, we adorned it with a barrel vault canopy crafted from top-tier Verseidag Type

2 white PVC, enhanced with a weldable PVDF lacquer. This meticulous attention to detail culminates in a product backed by a robust 10-year warranty, guaranteeing long-lasting quality.

DESIGNED TO MEET YOUR INDIVIDUAL REQUIREMENTS

Our fabric canopies and shade sail structures aren't just for the education sector. We have also completed many projects throughout the hospitality and leisure industries. Whether you want to change its size, shape or colour, we have the expertise to customise fabric canopies to suit your needs.
