

## CASE STUDY: X-FOOTBALL ARENA

### The Client

X-Football is a game supported by Umbro and played to FA rules, but it is taken to the extreme, hence the name, with only 4 players a side, no goalie and the pitch consisting of a 20m x 12m cage.

### The Challenge

The world cup finals of the unique sport were to take place at the Hilton Birmingham Metropole. J&J Carter were commissioned to design and build the temporary cages, and the fabric structure surrounding them, for the high profile event.

### The Solution

Two special steel cages measuring 20m long and 12m wide were erected, on site enclosed by a fabric structure covering an area of 240 sq metre that contained the cages and provided a spectator and access area.

A specialist spring sports flooring, manufactured in Scandanavia, was used throughout. "The X-Football Arena was an interesting project to be involved in, and provided us with an opportunity to demonstrate our versatility and ability to create bespoke structures." J&J Carter
