Press Release

J&J Carter are pleased to announce a strategic alliance with Darcy Spillcare Manufacture

J&J Carter, founded in 1988 are industry experts in the design, manufacture and installation of an array of fabric structures including marquees, sports halls, industrial structures and tensile fabric canopies. Drawing on this extensive experience, J&J Carter have developed their Environmental Division by finding ecological solutions to environmental problems.

The Eco-Dam is a temporary, re-usable, recyclable Flood Protection Barrier manufactured from high tensile PVC coated Polyester. As well as standard sizes J&J Carter also custom make the Eco-Dam for more technically challenging applications. As such it can be used to protect homes, as a temporary cofferdam on construction sites or during the re-construction of Water Ways and Rivers. When filled with water (this can be flood water) the Eco-Dam's specially patented design prevents rolling. The overlapping modular design also enables extended protection and can be arranged to form various shapes, thus affording protection to large areas. Therefore, the Eco-Dam is an effective alternative to more traditional methods of flood defense such as sand bags

The Eco-Dam has already been recognised for its quality and efficiency. At the North Hampshire Inspire Business Awards 2013 J&J Carter received the Innovation Excellence Award and were finalists for the Innovation and Technology Award at the Test Valley Business Awards 2014.

Having considered potential partners, J&J Carter are pleased to announce a strategic alliance with Darcy Spillcare Manufacture for the marketing and distribution of Eco-Dam. Darcy, established in 1935, are at the forefront of environmental protection. They specialise in the manufacture of solutions to assist sites in achieving environmental and ISO compliance. As a full service contract provider, they are committed to the continual advancement in health, safety and the environment.

Eco-Dam will be featured in Darcy's new catalogue; the Trident Industrial Marine Catalogue. It will also be appearing at Darcy's trade stand (Q25) at the Seawork International Exhibition from the 10th to the 12th June 2014. Seawork is the largest and fastest growing commercial marine and workboat event in Europe. It attracts over 7000 visitors a year from all around the world. Representatives from both Darcy and J&J Carter will be attending this free exhibition. J&J Carter would like to invite you to attend this event and see a demonstration of Eco-Dam.
