PRESS RELEASE

J & J Carter receives CE Marking approval

22nd December 2015

J & J Carter are proud to announce that they are now able to self certify all of their products using CE Marking & Quality Control.

Founded in 1988, J & J Carter has over 25 years of experience in the production of competitive, beautifully tailored, prestige Tensile Fabric structures. These include structures for events, architectural features, canopies and sports halls.

Being able to self certify their products, J & J Carter will benefit from the excellent opportunities now available for the company and its products:

- Signifies that the manufacturer has checked the products meet EU safety, health and environment requirements.
- Indicates the products compliance with the EU legislation.
- Permits the free movement of products within the European market.

This has been formally certificated by the UKAS accredited body Centre for Assessment against EN 1090 up to Execution Level 2, and is a huge milestone for J & J Carter and their products.

J & J Carter are the only fabrication company who have an approved Factory Production Control management system to enable the CE Marking of non-metallic products, giving them a huge advantage ahead of the competition.

J & J Carter pride itself on the quality of their delivery and select their own Supply Chain Partners to ensure a good service. J & J Carter have been recognised by their determination to provide a high standard of service and are certified against ISO 9001 for the Design, Manufacture and Installation of Fabric Structures under certificate number GB5316.

For more information on our products and self certification of our products, please contact one of our staff who will be happy to help on 01264 721630.
