

COMPLETE EVENT STRUCTURES GUIDE

BE INSPIRED!

Discover our range of clearspan structures, which can be customised for any event.

HIRE KUBE

Our completely customisable, modular, multi-story KUBE is now available to hire.

BRANDING

Digitally print any logo or full colour design directly on roofs, walls or gables. The options are limitless.

MARQUEE AND EVENT STRUCTURE COVERS

J & J Carter manufacture covers for every marquee and event structure, including custom structure designs, geodesic domes and stages.

EXCEPTIONAL FINISH THAT COMES AS STANDARD

Due to its exceptional quality, premium grade European cloth is the unbeatable choice when it comes to creating covers for temporary event structures and here is why:

- Durable, lightweight, flame retardant and resistant to creasing.
- Low-wick technology to prevent water ingress and resulting mould.
- Evenly coated both sides. No grain effect on the back-side which is prone to dirt becoming engrained.
- White stays white longer thanks to integrated top quality UV stabilisers.
- Special coating to enable easy cleaning and fast drying.
- Profit from the durability of covers made from premium grade European PVC and created by J & J Carter.

If there is a preferred fabric you would like us to work with, or a project that requires a bespoke texture or colour, we have access to a wide range of PVC suppliers to ensure the ideal selection is made to meet your requirements.

All covers come with a minimum 3 year warranty and some up to 10 years depending on the material.

Roof Covers: 3/5m bays, translucent, coloured, clear, opaque, printed.

Gable Ends: 2 Piece with lacing, 1 piece, branded, pitched or curved profile.

Side Walls: 2 Piece dutch laced, 1 piece, roll-up, zipped.

Window Walls: Various styles including Georgian, Panoramic, Premium.

Chinese Hats: Pagoda roof interegrated into clearspan structures providing peak roof style.

Pagodas: 3/4/5/6m Pagoda covers.

Pole Tents: Roof/Hip end sections made in 20", 30" up to 100" wide.

Insulated Roof Covers: The Air Filled Thermo Roof and Gable system provided with the inflation pack and hoses as a turn-key solution.

KUBE

AVAILABLE TO HIRE, LEASE OR BUY

KUBE is our completely customisable, modular, multi-storey structure, engineered to the highest specification. If you have a client looking to stand out at their next event, we can work with you to create the perfect bespoke event structure solution.

- ✓ Modular
- ✓ Customisable
- ✓ Insulated
- ✓ Sustainable
- ✓ Pre-wind loaded
- ✓ Building control approved
- ✓ DDR compliant
- ✓ Fast build and take down
- ✓ Also available as a single storey structure
- ✓ Adaptable to location and environment

MATERIAL CHOICES

Whilst every fabricator has their own chosen brand of PVC, there are numerous material options available. Some of these options will come at different prices depending upon the way the fabric is manufactured and it's uniqueness.

Regular PVC is a made up of a woven Polyester (PES) base cloth which provides the initial tensile strength; and is then coated with PVC and finished with a surface lacquer either Acrylic or PVDF. The finished article provides a smooth gloss finish which makes cleaning easy.

However, with today's coating and lacquering technology you can have various finishes, including the options below:

COLOURS

Some brands such as Saulea or Ferrari will offer up to 40 different colours.

STRIPES

Typically 9cm or 13cm stripes which are available in a wide variety of colours.

BI-COLOUR

Different colours on opposite surfaces, such as Circus Tents where the external surface may be red and the internal surface blue.

MATT FINISH

Renters used to having Polyester/Cotton Canvas covers who want to use PVC for the easier maintenance and prefer a non gloss or textured option.

EMBOSSING

Using the final surface treatment process, the lacquer is applied to the PVC surface. At this stage you can emboss or provide a surface texture.

CANVAS

We can also manufacture coverings using a woven Canvas alternative. The Canvas fabric uses a Polyester/Cotton blend, ideal for pole tension tents and tipi style structures.

HAMPSHIRE STRUCTURES CLEARSPAN FRAMES

The Hampshire Structures range of Höcker compatible Event and Hospitality structures have been designed by professionals with many years experience in the rental industry.

We have drawn upon that experience and developed a complete fleet of rental structures which encompass not only high grade materials and quality fabrication but also common sense engineering.

These structure systems are built using a modular structural aluminium frame to provide a clearspan environment which is durable, quick to erect and adaptable to your client's requirements.

All structures as a minimum are engineered in accordance with either British Standards 6399 or Eurocode, and comply with EN1090 for UKCA Marking per the Construction Products Regulations.

P SERIES

Profile:
89 x 48mm (2 track) or
110 x 48mm (4 track)

Spans:
2m - 10m (2 - 4 track profile)
12m (4 track profile only)

6m - 15m

Bay Spacing:
3m (all spans). 5m (up to 10m span). 6m (6m span only)

Side Height:
2.4m or 2.487m

Roof Pitch:
18°

Bracing:
Diagonal side wall brace in end bays and every 6th internal bay. Roof wires only required in 12m and 15m spans.

Tension System:
Bar tension as standard.

F SERIES

Profile:
170 x 80mm (4 track)

Spans:
10m - 15m

Bay Spacing:
5m

Side Height:
2.4 or 3m

Roof Pitch:
18°

Bracing:
Diagonal side wall and roof brace in end bays and every 6th internal bay.

Tension System:
Bar tension as standard.

F2 SERIES

Profile:
200 x 120mm (4 track)

Spans:
12m - 25m

Bay Spacing:
5m

Side Height:
2.4m or 3m

Roof Pitch:
18°

Bracing:
Diagonal side wall and roof brace in end bays and every 6th internal bay.

Tension System:
Bar tension as standard.

PG SERIES - Pagoda

Sizes:
• 3 x 3m • 4 x 4m
• 5 x 5m • 6 x 6m

Side Height:
2.4m or 3m

Tension System:
Bar tension as standard.
